# INDEX TO AUTHORS

A

**Altman, Kurt I.,** and **Evans, E. A., Jr.** Enzymic synthesis of triphosphopyridine nucleotide in cell-free extracts, 463

—. See *Portis and Altman,* 203

**Ames, Stanley R.** Effect of calcium on the inhibition of the succinic oxidase system by *d-α*-tocopheryl phosphate, 503

**Anker, H. S.** See *Bloch and Anker,* 765

**Anlyan, A. J.** See *Fishman and Anlyan,* 449

**Aronoff, S., Barker, H. A.,** and **Calvin, M.** Distribution of labeled carbon in sugar from barley, 459

**Axelrod, A. E., Flinn, Barbara C.,** and **Hofmann, Klaus.** The metabolism of oxybiotin in yeast, 195

—, **Hofmann, Klaus,** and **Daubert, B. F.** The biotin activity of a vaccenic acid fraction, 761

—. See *Hofmann, Winnick, and Axelrod,* 191

B

**Barker, H. A.** See *Aronoff, Barker, and Calvin,* 459

**Barki, V. H.** See *Geyer, Nath, Barki, Elvehjem, and Hart,* 227

**Baumann, C. A.** See *Johnson and Baumann,* 83

**Beiler, J. M.,** and **Martin, Gustav J.** Inhibition of the action of tyrosine decarboxylase by phosphorylated desoxypyridoxine, 345

**Belt, Margaret.** See *Franklin, Stokstad, Belt, and Jukes,* 427

**Bird, Robert M.** Glycolysis in human blood, 493

**Bloch, Konrad,** and **Anker, H. S.** Synthesis of glutathione in isolated liver, 765

—and **Rittenberg, D.** The metabolism of acetylamino acids, 467

**Bloor, W. R.** See *Hodge, MacLachlan, Bloor, Welch, Kornberg, and Falkenheim,* 707

**Blum, Amos E.** See *Horn, Jones, and Blum,* 71, 739

**Bodansky, Oscar.** See *Gutmann, Jandorf, and Bodansky,* 145

**Boggiano, E.** See *Hutchings and Boggiano,* 229

**Bolomey, René A.** Oxidative decomposition of vitamin A. I. Stability of vitamin A towards oxidation and irradiation, 323

—. II. Absorption spectrophotometry of oxidized vitamin A, 331

**Borsook, Henry,** and **Dubnoff, Jacob W.** Methionine formation by transmethylation *in vitro,* 247

— and —. Ornithine-catalyzed urea formation in liver homogenate, 461

**Boxer, George E., Jelinek, Viola C.,** and **Leghorn, Patricia M.** The colorimetric determination of streptomycin in clinical preparations, urine, and broth, 153

**Buchanan, John M., Sakami, Warwick,** and **Gurin, Samuel.** A study of the mechanism of fatty acid oxidation with isotopic acetoacetate, 411

—, —, —, and **Wilson, D. Wright.** Intermediates in the biological oxidation of isotopic acetoacetate, 403

**Buehler, Henry J., Schantz, E. J.,** and **Lamanna, Carl.** The elemental and amino acid composition of crystalline *Clostridium botulinum* type A toxin, 295

**Byers, L. W.** See *Rhymer, Wallace, Byers, and Carter,* 457

C

**Calvin, M.** See *Aronoff, Barker, and Calvin,* 459

**Campbell, M. E.** See *Morgan and Campbell,* 337

**Carpenter, F. H.** See *Loring, Carpenter, and Roll,* 601

**Carter, Herbert E., Haines, William J., Ledyard, W. E.,** and **Norris, William P.** Biochemistry of the sphingolipides. I. Preparation of sphingolip-

ides from beef brain and spinal cord, 77

**Carter, Herbert E.** See *Rhymer, Wallace, Byers, and Carter*, 457

**Chaikoff, I. L.** See *Hanahan and Chaikoff*, 699

—. See *Taurog and Chaikoff*, 49

**Chandler, Joseph P.** See *Mackenzie, Chandler, Keller, Rachele, Cross, Melville, and du Vigneaud*, 757

**Chanutin, Alfred.** See *Gjessing and Chanutin*, 657

**Chinard, Francis P.,** and **Van Slyke, Donald D.** Comparison of a modified Folin photometric procedure and the ninhydrin manometric method for the determination of amino acid nitrogen in plasma, 571

**Ciaramelli, L. C.** See *Mason, Power, Rynearson, Ciaramelli, Li, and Evans*, 223

**Cohen, Philip P.,** and **McGilvery, R. W.** Peptide bond synthesis. II. The formation of *p*-aminohippuric acid by liver homogenates, 119

**Cross, Nancy.** See *Mackenzie, Chandler, Keller, Rachele, Cross, Melville, and du Vigneaud*, 757

**Csonka, Frank A., Denton, Charles A.,** and **Ringel, S. J.** The methionine and cystine content of hen's eggs, 259

D

**Daniel, Louise J., Norris, L. C., Scott, M. L.,** and **Heuser, G. F.** Growth inhibition of bacteria by synthetic pterins. I. Studies with *Streptococcus faecalis, Lactobacillus casei,* and *Lactobacillus arabinosus*, 689

**Daubert, B. F.** See *Axelrod, Hofmann, and Daubert*, 761

**Day, Priscilla.** See *Michel and Scheinberg*, 277

**DeMeio, R. H.,** and **Henriques, F. C., Jr.** Tellurium. IV. Excretion and distribution in tissues studied with a radioactive isotope, 609

**Denton, Charles A.** See *Csonka, Denton, and Ringel*, 259

**Deutsch, H. F.** A study of whey proteins from the milk of various animals, 437

**Dittmer, Karl,** and **du Vigneaud, Vincent.** Antibiotin activity of imidazolidone aliphatic acids, 63

**Dobriner, Konrad, Lieberman, Seymour, Hariton, L., Sarett, Lewis Hastings,** and **Rhoads, C. P.** The isolation of $\Delta^9$-etiocholenol-3($\alpha$)-one-17 from human urine, 221

**Dubnoff, Jacob W.** See *Borsook and Dubnoff*, 247, 461

**Dunn, Max S.** See *Franklin, Li, and Dunn*, 515

E

**Ehrensvärd, G., Sperber, E., Saluste, E., Reio, L.,** and **Stjernholm, R.** Metabolic connection between proline and glycine in the amino acid utilization of *Torulopsis utilis*, 759

**Elvehjem, C. A.** See *Geyer, Nath, Barki, Elvehjem, and Hart*, 227

—. See *Jaffé and Elvehjem*, 287

—. See *Lardy, Potter, and Elvehjem*, 451

**Ely, Ray E.** See *Olson, Ely, and Reineke*, 681

**Evans, E. A., Jr.** See *Altman and Evans*, 463

**Evans, H. J.** See *Scholander and Evans*, 551

**Evans, Herbert M.** See *Li, Kalman, and Evans*, 625

—. See *Mason, Power, Rynearson, Ciaramelli, Li, and Evans*, 223

F

**Falkenheim, Marlene, Neuman, William F.,** and **Hodge, Harold Carpenter.** Phosphate exchange as the mechanism for adsorption of the radioactive isotope by the calcified tissues, 713

—. See *Hodge, MacLachlan, Bloor, Welch, Kornberg, and Falkenheim*, 707

**Fishman, William H.** β-Glucuronidase: its relation to the action of the estrogenic hormones, 7
— **and Anlyan, A. J.** The presence of high β-glucuronidase activity in cancer tissue, 449
**Flemister, Sarah C.** See *Scholander, Flemister, and Irving*, 173
**Flinn, Barbara C.** See *Axelrod, Flinn, and Hofmann*, 195
**Floyd, Curtis S.** See *Gjessing and Chanutin*, 657
**Folch, Jordi,** and **Lauren, Miriam.** Estimation of potassium in biological materials as potassium phosphotungstate, 539
**Franklin, A. L., Li, Choh Hao,** and **Dunn, Max S.** The amino acid composition of anterior hypophyseal growth hormone, 515
—, **Stokstad, E. L. R., Belt, Margaret,** and **Jukes, Thomas H.** Biochemical experiments with a synthetic preparation having an action antagonistic to that of pteroylglutamic acid, 427
**Frantz, Ivan D., Jr.,** and **Stephenson, Mary L.** A study of the reaction kinetics of a catheptic enzyme with a decarboxylase as indicator, 359
**Friedberg, Felix, Winnick, Theodore,** and **Greenberg, David M.** Peptide synthesis *in vivo*, 763
**Friedkin, Morris,** and **Lehninger, Albert L.** The synthesis of phosphomalic acid, 183
**Fruton, Joseph S., Simmonds, Sofia,** and **Smith, Virginia A.** The action of *Escherichia coli* on acetylidehydroamino acids, 267
—. See *Simmonds, Tatum, and Fruton*, 91
—. See *Yudkin and Fruton*, 521

G

**Galston, Arthur W.** Synergism between indoleacetic and nicotinic acids in a plant growth inhibition, 465
**Geyer, R. P., Nath, H., Barki, V. H., Elvehjem, C. A.,** and **Hart, E. B.** The vaccenic acid content of various fats and oils, 227
**Gjessing, Erland C.,** and **Chanutin, Alfred.** An electrophoretic study of plasma and plasma fractions of normal and injured rats, 657
**Goldwater, William H.,** and **Stetten, DeWitt, Jr.** Studies in fetal metabolism, 723
**Gollub, Miriam C.,** and **Vennesland, Birgit.** Fixation of carbon dioxide by a plant oxalacetate carboxylase, 233
**Gonçalves, Jose M., Price, Vincent E.,** and **Greenstein, Jesse P.** Enzymatic hydrolysis of acetyldehydroalanine, 225
**Gowen, Leo F. X.** See *Michel and Scheinberg*, 277
**Gray, Charles H.,** and **Holt, Lewis B.** The porphyrin produced by diphtheria bacillus, 235
**Greenberg, David M.** See *Friedberg, Winnick, and Greenberg*, 763
**Greenstein, Jesse P.** See *Gonçalves, Price, and Greenstein*, 225
**Guest, M. Mason.** See *Ware, Guest, and Seegers*, 231
**Gurin, Samuel.** See *Buchanan, Sakami, and Gurin*, 411
—. See *Buchanan, Sakami, Gurin, and Wilson*, 403
**Gustavson, K. H.** Note on the reaction of formaldehyde with collagen, 531
**Gutmann, Helmut R., Jandorf, Bernard J.,** and **Bodansky, Oscar.** The rôle of pyridine nucleotides in the reduction of methemoglobin, 145

H

**Hack, M. H.** Estimation of the phospholipides in human blood, 137
**Haines, William J.** See *Carter, Haines, Ledyard, and Norris*, 77
**Hanahan, Donald J.,** and **Chaikoff, I. L.** A new phospholipide-splitting enzyme specific for the ester linkage between the nitrogenous base and the phosphoric acid grouping, 699

**Hariton, L.** See *Dobriner, Lieberman, Hariton, Sarett, and Rhoads,* 221
**Hart, E. B.** See *Geyer, Nath, Barki, Elvehjem, and Hart,* 227
**Henriques, F. C., Jr.** See *DeMeio and Henriques,* 609
**Heuser, G. F.** See *Daniel, Norris, Scott, and Heuser,* 689
**Hodge, Harold Carpenter, MacLachlan, P. L., Bloor, W. R., Welch, Eileen A., Kornberg, Sylvia Levy,** and **Falkenheim, Marlene.** Lipides of the fasting mouse. III. Phospholipide to neutral fat relationship in the blood lipides, 707
—. See *Falkenheim, Neuman, and Hodge,* 713
**Hofmann, Klaus, Winnick, Theodore,** and **Axelrod, A. E.** The use of Raney's nickel in a differential assay for oxybiotin and biotin, 191
—. See *Axelrod, Flinn, and Hofmann,* 195
—. See *Axelrod, Hofmann, and Daubert,* 761
**Hogness, Katharine R.** See *Petermann, Young, and Hogness,* 379
**Holt, Lewis B.** See *Gray and Holt,* 235
**Horn, Millard J., Jones, D. Breese,** and **Blum, Amos E.** Microbiological determination of lysine in proteins and foods, 71
—, —, and —. Microbiological determination of threonine in proteins and foods, 739
**Huebner, Charles F.,** and **Jacobs, Walter A.** The aconite alkaloids. XVI. On staphisine and the hydrocarbon obtained from its dehydrogenation, 211
**Huffman, Max N.** 16-Substituted steroids. III. The partial synthesis of estriol, 167
**Hutchings, B. L.,** and **Boggiano, E.** Oleic acid as a growth factor for various lactobacilli, 229

I

**Irving, Laurence.** See *Scholander, Flemister, and Irving,* 173
—. See *Scholander and Irving,* 561

J

**Jacobs, Walter A.** See *Huebner and Jacobs,* 211
**Jaffé, Werner G.,** and **Elvehjem, C. A.** Fractionation of growth-stimulating factor in liver, 287
**Jandorf, Bernard J.** See *Gutmann, Jandorf, and Bodansky,* 145
**Jelinek, Viola C.** See *Boxer, Jelinek, and Leghorn,* 153
**Jervis, George A.** Studies on phenylpyruvic oligophrenia. The position of the metabolic error, 651
**Johnson, R. M.,** and **Baumann, C. A.** Studies on the reaction of certain carotenoids with antimony trichloride, 83
**Jones, D. Breese.** See *Horn, Jones, and Blum,* 71, 739
**Jukes, Thomas H.** See *Franklin, Stokstad, Belt, and Jukes,* 427

K

**Kalman, C.** See *Li, Kalman, and Evans,* 625
**Keller, Elizabeth B.** See *Mackenzie, Chandler, Keller, Rachele, Cross, Melville, and du Vigneaud,* 757
—. See *Melville, Rachele, and Keller,* 419
**Kochakian, Charles D.,** and **Vail, Virginia N.** The effect of adrenalectomy, adrenal cortical hormones, and testosterone propionate plus adrenal cortical extract on the arginase activity of the liver and kidney of the rat, 1
**Kornberg, Sylvia Levy.** See *Hodge, MacLachlan, Bloor, Welch, Kornberg, and Falkenheim,* 707

L

**Lamanna, Carl.** See *Buchler, Schantz, and Lamanna,* 295
**Lardy, Henry A., Potter, Richard L.,** and **Elvehjem, C. A.** The rôle of biotin in bicarbonate utilization by bacteria, 451
**Lauren, Miriam.** See *Folch and Lauren,* 539
**Lavine, Theodore F.** The formation, resolution, and optical properties of

the diastereoisomeric sulfoxides derived from L-methionine, 477
**Ledyard, W. E.** See *Carter, Haines, Ledyard, and Norris*, 77
**Leghorn, Patricia M.** See *Bozer, Jelinek, and Leghorn*, 153
**Lehninger, Albert L.** See *Friedkin and Lehninger*, 183
**Lens, J.** The inactivation of insulin solutions, 313
**Lewis, Howard B.** See *Schofield and Lewis*, 373
**Li, Choh Hao, Kalman, C., and Evans, Herbert M.** The effect of the hypophyseal growth hormone on the alkaline phosphatase of rat plasma, 625
—. See *Franklin, Li, and Dunn*, 515
—. See *Mason, Power, Rynearson, Ciaramelli, Li, and Evans*, 223
**Lieberman, Seymour.** See *Dobriner, Lieberman, Hariton, Sarett, and Rhoads*, 221
**Loring, Hubert S., Carpenter, F. H., and Roll, Paul M.** The hydrolysis of yeast ribonucleic acid by ribonucleinase. I. The extent of hydrolysis and the preparation of ribonucleinase-resistant fractions after ribonucleinase treatment, 601

M

**Mackenzie, Cosmo G., Chandler, Joseph P., Keller, Elizabeth B., Rachele, Julian R., Cross, Nancy, Melville, Donald B., and du Vigneaud, Vincent.** The demonstration of the oxidation *in vivo* of the methyl group of methionine, 757
**MacLachlan, P. L.** See *Hodge, MacLachlan, Bloor, Welch, Kornberg, and Falkenheim*, 707
**Majoor, C. L. H.** The possibility of detecting individual proteins in blood serum by differentiation of solubility curves in concentrated sodium sulfate solutions. II. Comparison of solubility curves with results of electrophoresis experiments, 583
**Martin, Gustav J.** See *Beiler and Martin*, 345
**Mason, Harold L., Power, Marschelle H., Rynearson, E. H., Ciaramelli, L. C., Li, Choh Hao, and Evans, Herbert M.** Results of administration of anterior pituitary adrenocorticotropic hormone to a normal human being, 223
**McGilvery, R. W.** See *Cohen and McGilvery*, 119
**Melville, Donald B., Rachele, Julian R., and Keller, Elizabeth B.** A synthesis of methionine containing radiocarbon in the methyl group, 419
—. See *Mackenzie, Chandler, Keller, Rachele, Cross, Melville, and du Vigneaud*, 757
**Meyerhof, Otto.** See *Polis and Meyerhof*, 389
**Michel, Harry O., and Scheinberg, I. Herbert.** The effects of cytochrome *c* on anoxic and cyanide-poisoned rats, 277
**Miller, Gail Lorenz.** Sedimentation, viscosity, and electrophoretic studies on purified Lee influenza virus preparations, **745**
**Milne, John.** Serum protein fractionation: a comparison of sodium sulfate precipitation and electrophoresis, 595
**Morgan, J. F., and Campbell, M. E.** A rapid method for the production and isolation of penicillinase, 337
**Morrison, Peter R.** An automatic apparatus for the determination of oxygen consumption, 667

N

**Nath, H.** See *Geyer, Nath, Barki, Elvehjem, and Hart*, 227
**Neuman, William F.** See *Falkenheim, Neuman, and Hodge*, 713
**Norris, L. C.** See *Daniel, Norris, Scott, and Heuser*, 689
**Norris, William P.** See *Carter, Haines, Ledyard, and Norris*, 77

O

**Olson, Kenneth J., Ely, Ray E., and Reineke, E. P.** An improved method for the determination of thiouracil, 681

P

**Petermann, Mary L., Young, Nelson R.,** and **Hogness, Katharine R.** A comparison of the Howe and the electrophoretic methods for the determination of plasma albumin, 379

**Polis, B. David,** and **Meyerhof, Otto.** Studies on adenosinetriphosphatase in muscle. I. Concentration of the enzyme on myosin, 389

**Portis, Richard A.,** and **Altman, Kurt I.** The action of proteolytic enzymes and protaminase on salmine sulfate, 203

**Potter, Richard L.** See *Lardy, Potter, and Elvehjem*, 451

**Potter, Van R.** The assay of animal tissues for respiratory enzymes. VI. Further studies on oxidative phosphorylation, 17

**Power, Marschelle H.** See *Mason, Power, Rynearson, Ciaramelli, Li, and Evans*, 223

**Price, Vincent E.** See *Gonçalves, Price, and Greenstein*, 225

Q

**Quaife, Mary Louise.** Tocopherols (vitamin E) in milk: their chemical determination and occurrence in human milk, 513

R

**Rabinowitz, Jesse C.,** and **Snell, Esmond E.** The vitamin $B_6$ group. XI. An improved method for assay of vitamin $B_6$ with *Streptococcus faecalis*, 631

—and —. XII. Microbiological activity and natural occurrence of pyridoxamine phosphate, 643

**Rachele, Julian R.** See *Mackenzie, Chandler, Keller, Rachele, Cross, Melville, and du Vigneaud*, 757

—. See *Melville, Rachele, and Keller*, 419

**Reineke, E. P.** See *Olson, Ely, and Reineke*, 681

**Reio, L.** See *Ehrensvärd, Sperber, Saluste, Reio, and Stjernholm*, 759

**Rhoads, C. P.** See *Dobriner, Lieberman, Hariton, Sarett, and Rhoads*, 221

**Rhymer, Ione, Wallace, G. I., Byers, L. W.,** and **Carter, Herbert E.** The antistreptomycin activity of lipositol, 457

**Ringel, S. J.** See *Csonka, Denton, and Ringel*, 259

**Rittenberg, D.** See *Block and Rittenberg*, 467

**Rogers, Lorene Lane,** and **Shive, William.** Biochemical transformations as determined by competitive analogue-metabolite growth inhibitions. VI. Prevention of biotin synthesis by 2-oxo-4-imidazolidinecaproic acid, 57

—. See *Shive and Rogers*, 453

**Roll, Paul M.** See *Loring, Carpenter, and Roll*, 601

**Rynearson, E. H.** See *Mason, Power, Rynearson, Ciaramelli, Li, and Evans*, 223

S

**Sakami, Warwick.** See *Buchanan, Sakami, and Gurin*, 411

—. See *Buchanan, Sakami, Gurin, and Wilson*, 403

**Saluste, E.** See *Ehrensvärd, Sperber, Saluste, Reio, and Stjernholm*, 759

**Sarett, Lewis Hastings.** See *Dobriner, Lieberman, Hariton, Sarett, and Rhoads*, 221

**Schantz, E. J.** See *Buehler, Schantz, and Lamanna*, 295

**Scheinberg, I. Herbert.** See *Michel and Scheinberg*, 277

**Schofield, Frances A.,** and **Lewis, Howard B.** A comparative study of the metabolism of $\alpha$-alanine, $\beta$-alanine, serine, and isoserine. II. Glycogen content of the liver after oral administration of the amino acids, 373

**Scholander, P. F.,** and **Evans, H. J.** Microanalysis of fractions of a cubic millimeter of gas, 551

—, **Flemister, Sarah C.,** and **Irving, Laurence.** Microgasometric estimation of the blood gases. V. Combined carbon dioxide and oxygen, 173

— and **Irving, Laurence.** Micro blood gas analysis in fractions of a cubic millimeter of blood, 561

**Scott, M. L.** See *Daniel, Norris, Scott, and Heuser*, 689
**Seegers, Walter H.** See *Ware, Guest, and Seegers*, 231
**Shive, William,** and **Rogers, Lorene Lane.** Involvement of biotin in the biosynthesis of oxalacetic and α-ketoglutaric acids, 453
—. See *Rogers and Shive*, 57
**Shorb, Mary S.** Unidentified growth factors for *Lactobacillus lactis* in refined liver extracts, 455
**Shorr, Ephraim.** See *Taussky and Shorr*, 103
**Simmonds, Sofia, Tatum, E. L.,** and **Fruton, Joseph S.** The utilization of phenylalanine and tyrosine derivatives by mutant strains of *Escherichia coli*, 91
—. See *Fruton, Simmonds, and Smith*, 267
**Simonsen, Daisy G., Westover, Leola M.,** and **Wertman, Maxine.** The determination of serum magnesium by the molybdivanadate method for phosphate, 39
**Sizer, Irwin W.** The action of tyrosinase on certain proteins and products of their autolysis, 393
**Smith, Virginia A.** See *Fruton, Simmonds, and Smith*, 267
**Snell, Esmond E.** See *Rabinowitz and Snell*, 631, 643
**Sperber, E.** See *Ehrenswärd, Sperber, Saluste, Reio, and Stjernholm*, 739
**Stephenson, Mary L.** See *Frantz and Stephenson*, 359
—. See *Zamecnik and Stephenson*, 349
**Stetten, DeWitt, Jr.** See *Goldwater and Stetten*, 723
**Stjernholm, R.** See *Ehrenswärd, Sperber, Saluste, Reio, and Stjernholm*, 739
**Stokstad, E. L. R.** See *Franklin, Stokstad, Belt, and Jukes*, 427
**Struglia, Lena.** See *Daniel, Norris, Scott, and Heuser*, 689
**Stumpf, P. K.** A colorimetric method for the determination of desoxyribonucleic acid, 367

T

**Tatum, E. L.** See *Simmonds, Tatum, and Fruton*, 91
**Taurog, Alvin,** and **Chaikoff, I. L.** The metabolic interrelations of thyroxine and diiodotyrosine in the thyroid gland as shown by a study of their specific activity-time relations in rats injected with radioactive iodine, 49
**Taussky, Hertha H.,** and **Shorr, Ephraim.** A microcolorimetric method for the determination of citric acid, 103

V

**Vail, Virginia N.** See *Kochakian and Vail*, 1
**Van Slyke, Donald D.** See *Chinard and Van Slyke*, 571
**Vennesland, Birgit.** See *Gollub and Vennesland*, 233
**Vickery, Hubert Bradford.** Rules for the nomenclature of the natural amino acids and related substances, 237
**du Vigneaud, Vincent.** See *Dittmer and du Vigneaud*, 63
—. See *Mackenzie, Chandler, Keller, Rachele, Cross, Melville, and du Vigneaud*, 757

W

**Wallace, G. I.** See *Rhymer, Wallace, Byers, and Carter*, 457
**Ware, Arnold G., Guest, M. Mason,** and **Seegers, Walter H.** A factor in plasma which accelerates the activation of prothrombin, 231
**Welch, Eileen A.** See *Hodge, MacLachlan, Bloor, Welch, Kornberg, and Falkenheim*, 707
**Wertman, Maxine.** See *Simonsen, Westover, and Wertman*, 39
**Westover, Leola M.** See *Simonsen, Westover, and Wertman*, 39
**Wilson, D. Wright.** See *Buchanan, Sakami, Gurin, and Wilson*, 403
**Winnick, Theodore.** See *Friedberg, Winnick, and Greenberg*, 763
—. See *Hofmann, Winnick, and Axelrod*, 191

**Young, Nelson F.** See *Petermann, Young, and Hogness*, 379
**Yudkin, Warren H.**, and **Fruton, Joseph S.** On the proteolytic enzymes of animal tissues. VI. Dehydropeptidase, 521

Z

**Zamecnik, Paul C.**, and **Stephenson, Mary L.** A manometric method for determining the kinetics of an enzymatic hydrolysis of peptides, 349
**Zvirblis, Peter.** See *Michel and Scheinberg*, 277

# INDEX TO SUBJECTS

A

**Acetic acid:** Indole-, nicotinic acid and, plant growth inhibition, relation, *Galston*, 465

Oxal-, biosynthesis, biotin rôle, *Shive and Rogers*, 453

**Acetoacetate:** Isotopic, fatty acid oxidation mechanism, use in study, *Buchanan, Sakami, and Gurin*, 411

—, oxidation, biological, products, *Buchanan, Sakami, Gurin, and Wilson*, 403

**Acetylamino acid(s):** Metabolism, *Bloch and Rittenberg*, 467

**Acetyldehydroalanine:** Hydrolysis, enzymatic, *Gonçalves, Price, and Greenstein*, 225

**Acetyldehydroamino acid(s):** *Escherichia coli* effect, *Fruton, Simmonds, and Smith*, 267

**Aconite:** Alkaloids, *Heubner and Jacobs*, 211

**Adenosinetriphosphatase:** Muscle, *Polis and Meyerhof*, 389

Myosin, effect, *Polis and Meyerhof*, 389

**Adrenal(s):** Cortex extract and testosterone propionate, liver and kidney arginase, effect, *Kochakian and Vail*, 1

— hormones, liver and kidney arginase, effect, *Kochakian and Vail*, 1

**Adrenalectomy:** Kidney arginase, effect, *Kochakian and Vail*, 1

Liver arginase, effect, *Kochakian and Vail*, 1

**Adrenocorticotropic hormone:** Pituitary, anterior, administration effect, *Mason, Power, Rynearson, Ciaramelli, Li, and Evans*, 223

**Alanine:** α-, metabolism, *Schofield and Lewis*, 373

Acetyldehydro-, hydrolysis, enzymatic, *Gonçalves, Price, and Greenstein*, 225

β-, metabolism, *Schofield and Lewis*, 373

Phenyl-. *See* Phenylalanine

**Albumin:** Blood plasma, determination, Howe and electrophoretic methods, comparison, *Petermann, Young, and Hogness*, 379

**Alkaloid(s):** Aconite, *Huebner and Jacobs*, 211

**Amino acid(s):** Acetyl-, metabolism, *Bloch and Rittenberg*, 467

Acetyldehydro-, *Escherichia coli* effect, *Fruton, Simmonds, and Smith*, 267

*Clostridium botulinum* toxin, type A, crystalline, *Buehler, Schantz, and Lamanna*, 295

Hypophyseal growth hormone, *Franklin, Li, and Dunn*, 515

Liver glycogen, administration effect, *Schofield and Lewis*, 373

Nitrogen, blood plasma, determination, Folin photometric and ninhydrin manometric, comparison, *Chinard and Van Slyke*, 571

Nomenclature, *Vickery*, 237

*Torulopsis utilis*, utilization, *Ehrensvärd, Sperber, Saluste, Reio, and Stjernholm*, 759

**Aminohippuric acid:** *p*-, formation, liver homogenates, *Cohen and McGilvery*, 119

**Anoxia:** Cytochrome *c* effect, *Michel and Scheinberg*, 277

**Antimony trichloride:** Carotenoids, reaction, *Johnson and Baumann*, 83

**Apparatus:** Oxygen consumption determination, *Morrison*, 667

**Arginase:** Kidney, adrenalectomy, adrenal cortical hormones, testosterone propionate plus adrenal cortex extract, effect, *Kochakian and Vail*, 1

Liver, adrenalectomy, adrenal cortical hormones, testosterone propionate plus adrenal cortex extract, effect, *Kochakian and Vail*, 1

B

**Bacillus:** *See also Lactobacillus*

**Bacteria:** Bicarbonate utilization, biotin rôle, *Lardy, Potter, and Elvehjem*, 451
Growth, pterins, synthetic, effect, *Daniel, Norris, Scott, and Heuser*, 689
*See also Clostridium, Escherichia, Streptococcus*
